Video -1) Docker - Architecture (Beginner to Advance)

What is Docker?

what are the components of Docker?

Legacy architecture of Deployment?

What are the advantages of Docker?

What are the components of docker?

a) What is docker deamon?

b) What are docker images?

c) What aret the docker containers?

d) What is docker networking ?

e) What is port mapping in docker?

F) What is docker hub?

Vidoe - 2) Two Live Project

Commands of docker Containers

How to install docker in linux using AWS?

docker -v

docker run

docker ps

docker ps -a

docker stop

docker kill

docker rm

docker stop

Command for docker Images

docker build

docker images

docker inspect

docker history

docker images -q

dcoker rmi <image-name>

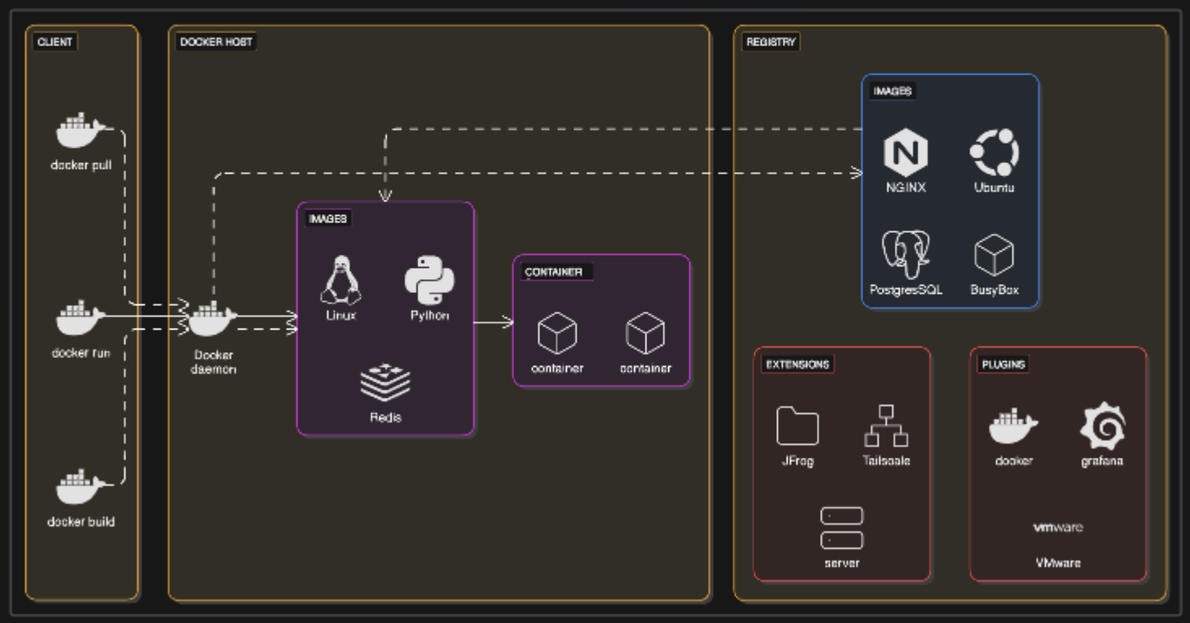
Live project.

Vidoe - 1)

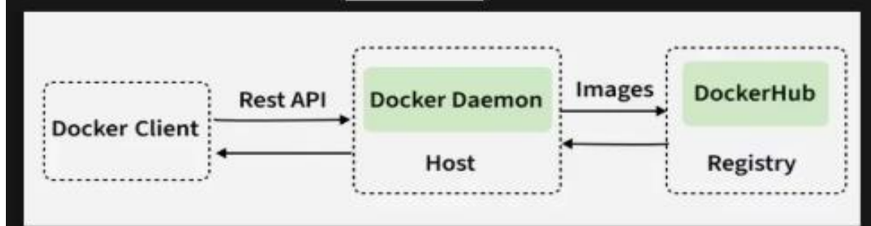
Docker Arch –

Docker Architecture

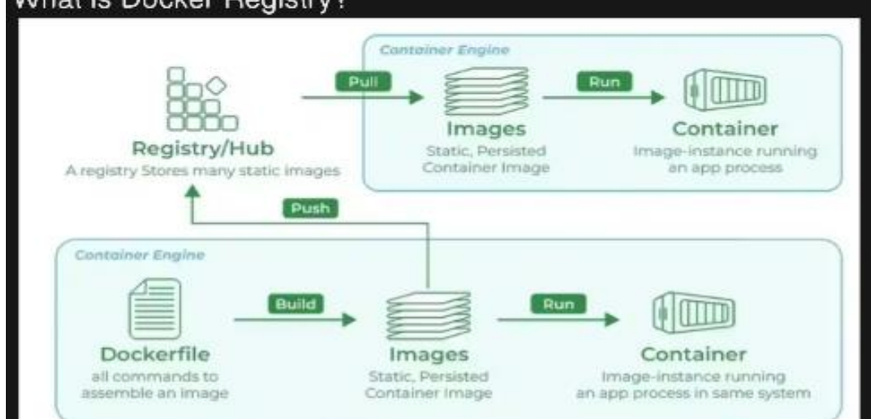
Architecture Diagram

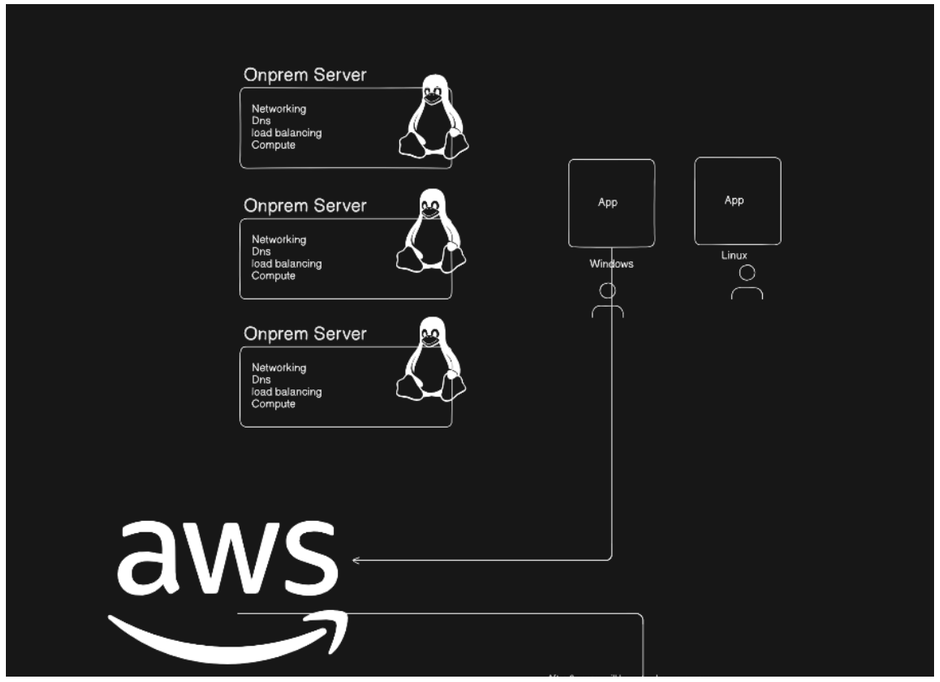


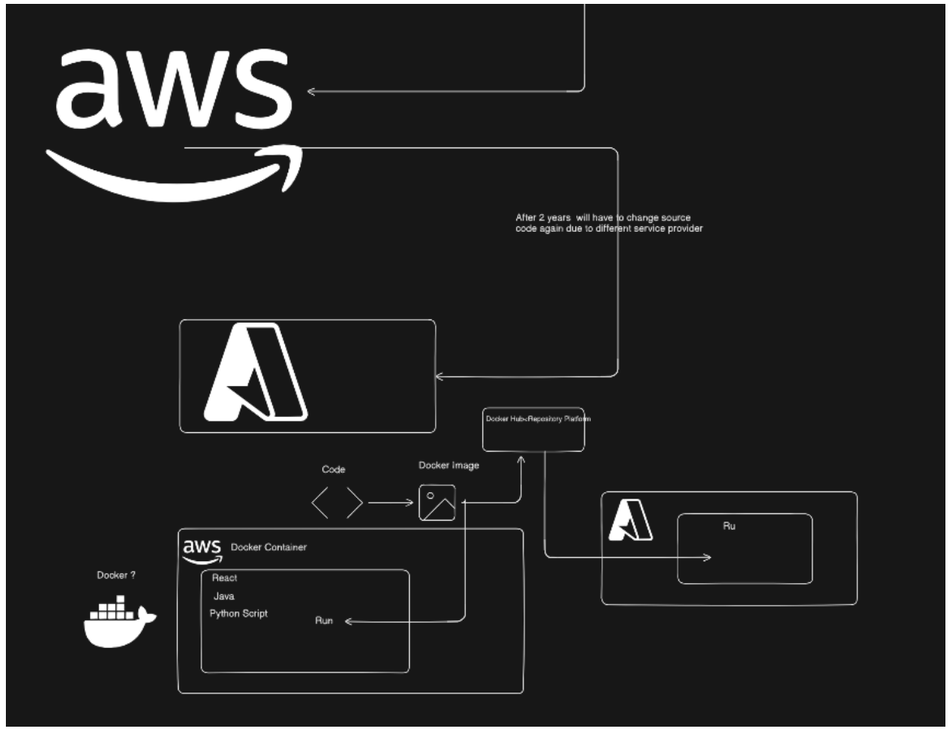
What is docker deamon(dockerd)



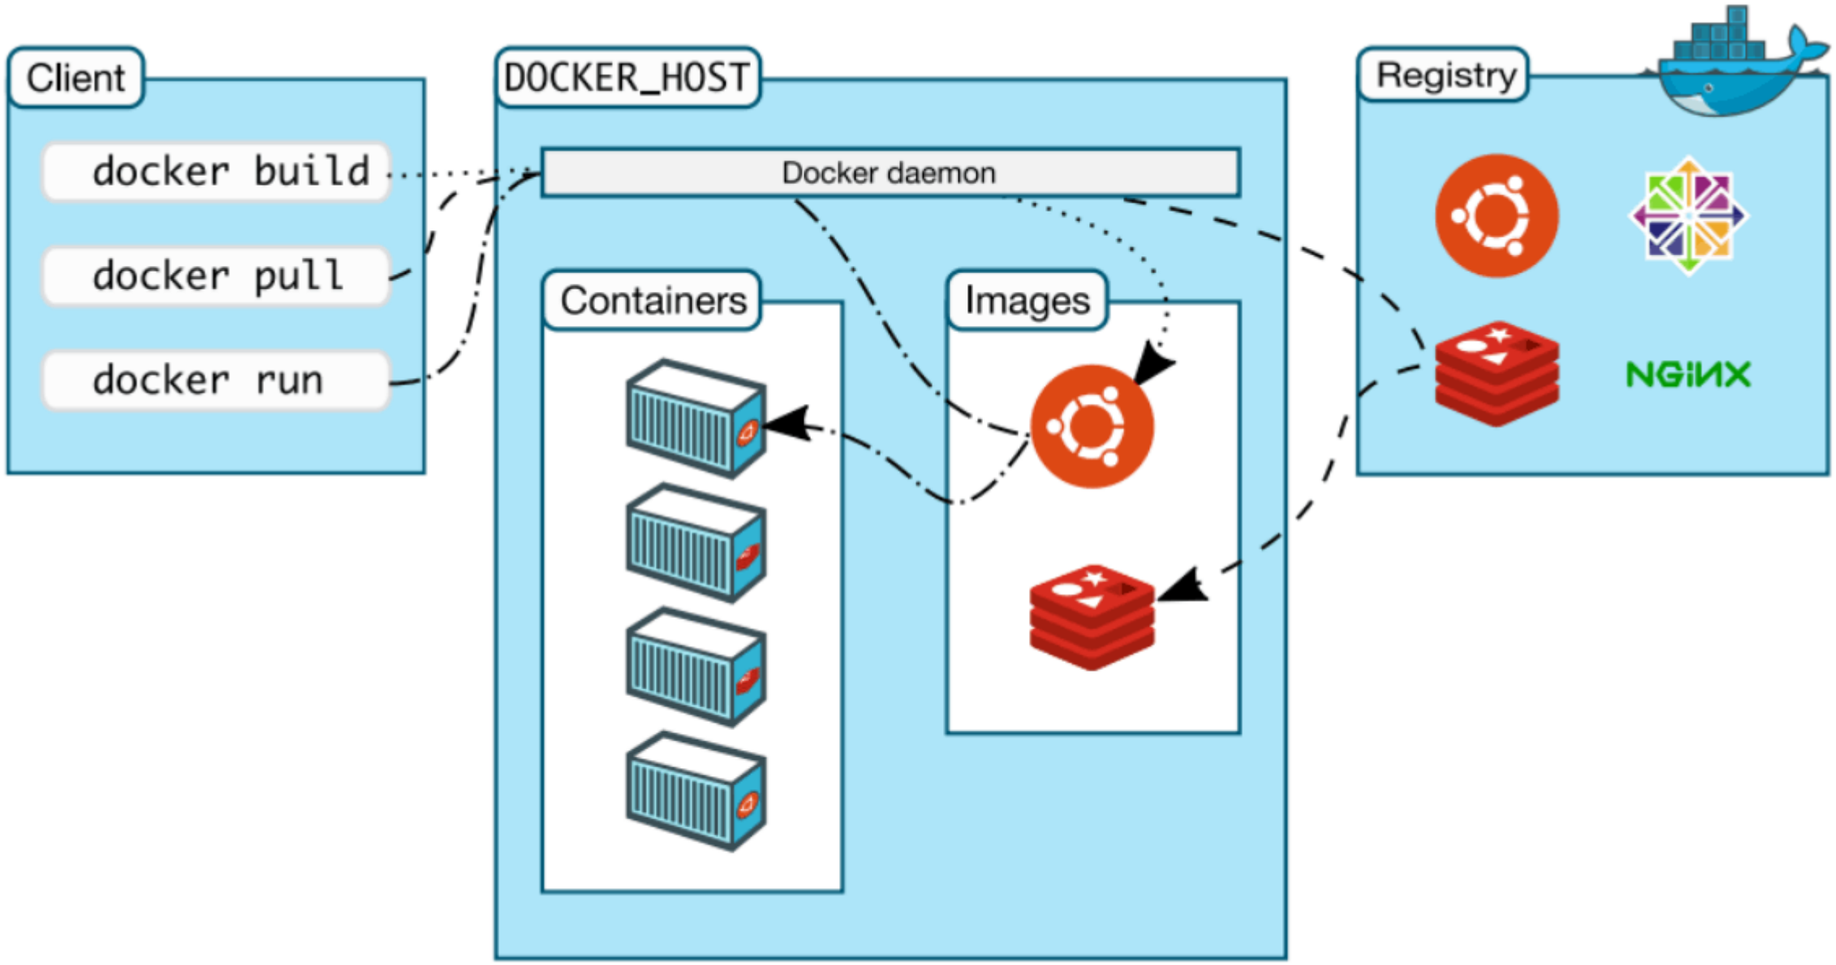
What is Docker Registry?



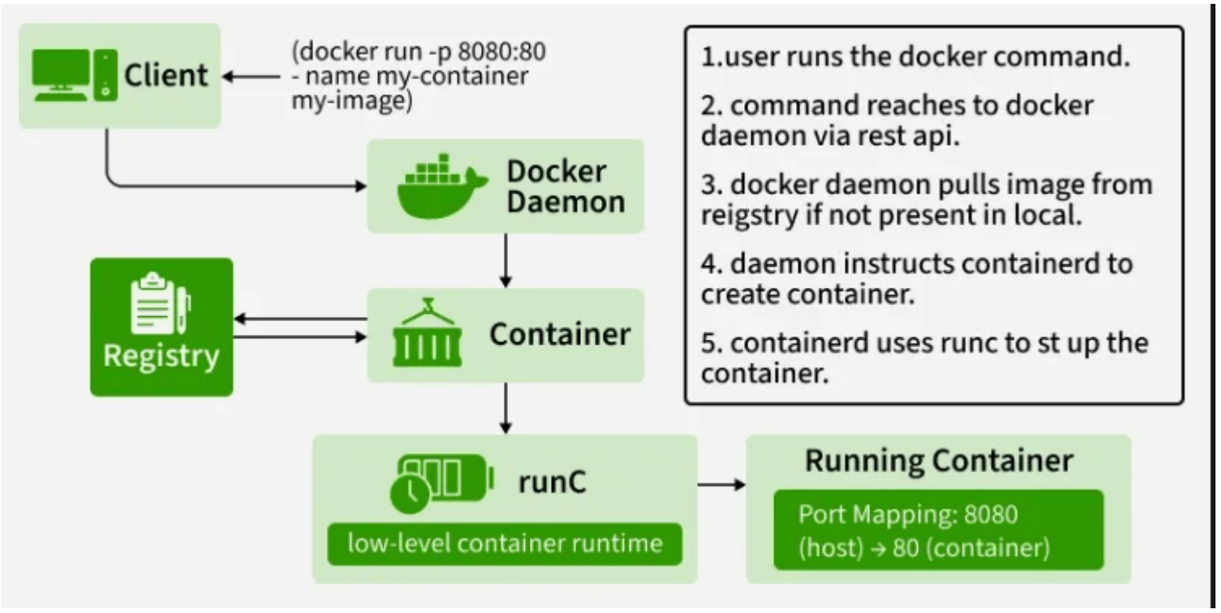




aws
After 2 years will have to change source code again due to different service provider
Docker Hub-Repository Platform
Code
Docker image
Ru
aws Docker Container
Docker ?
React
Java
Python Script
Run



Docker - Client Server **Architecture used for deployments.**



Client
(docker run -p 8080:80
- name my-container
my-image)
Docker
Daemon
Registry
Container
runC
low-level container runtime
Running Container
Port Mapping: 8080
(host) → 80 (container)
1.user runs the docker command.
2. command reaches to docker daemon via rest api.
3. docker daemon pulls image from reigstry if not present in local.
4. daemon instructs containerd to create container.
5. containerd uses runc to st up the container.
